

P7 - Environment and nutrient recycling

Stina Jansson, Dept. of Chemistry, UmU

My background

My background

The P7 platform

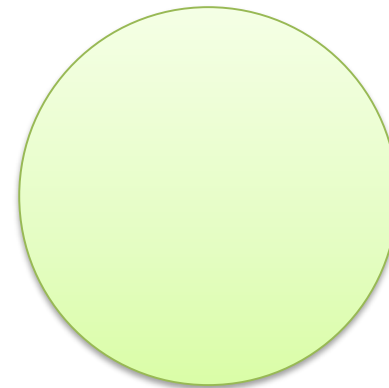

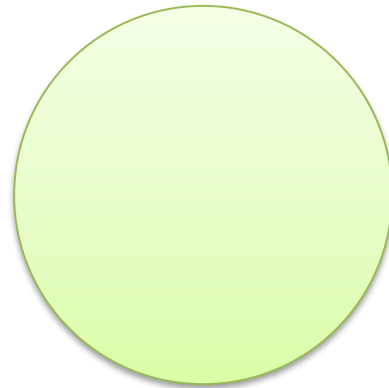

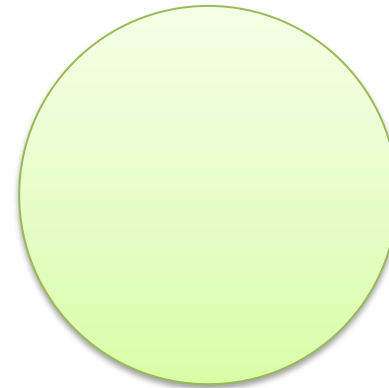

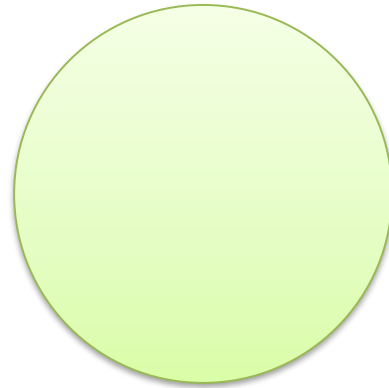

Environment and nutrient recycling – P7

The general objectives are;

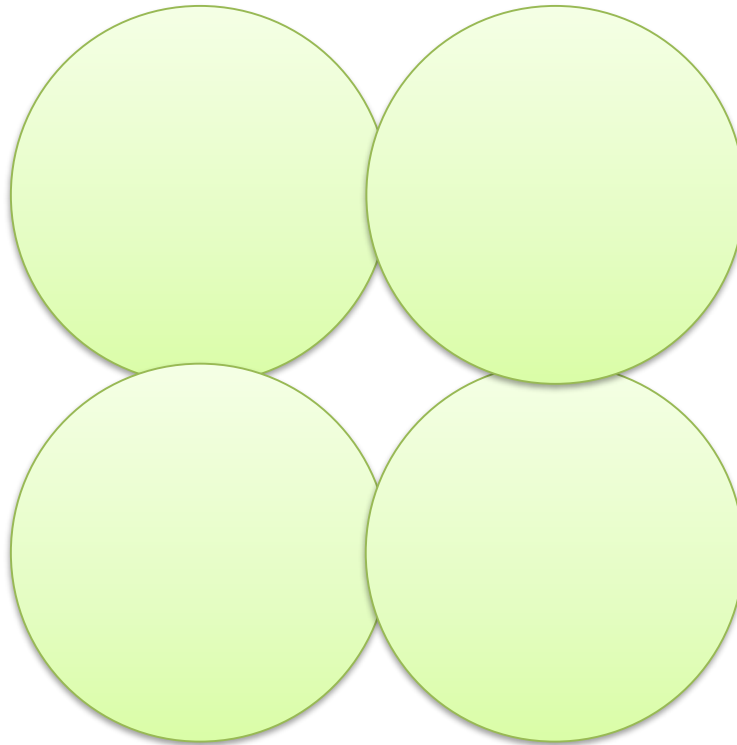

- to contribute to the development of environmentally sound and sustainable forest-based biochemical and thermochemical industrial processes,
- that the ecological footprint in terms of emissions of environmental hazardous substances to soil, water and atmosphere should be minimized, and
- that complete bio-mass utilization loops should be created.

Do we need a specific platform for that?

Plans ahead

- Joint proposals in the interfaces where our disciplines meet
- Use of B4E funds to obtain additional funding
- Identify suitable targeted calls (e.g. Formas)
- Degree projects
- PhD student resources e.g. in UmU:s Industrial Doctoral School
- Synergies with other ongoing projects/research programmes, e.g. Green North

Thank you for
listening!
